## Working with Text

**Question 1:** When he felt the earthquake, do you think Ignesium immediately worried about a tsunami? Give reasons for your answer. Which sentence in the text tells you that the Ignesium family did not have any time to discuss and plan their course of action after the tsunami struck?

**Answer:** No, Ignesium did not suspect a tsunami when he felt the tremors. He took his television set and placed it on the ground so that it would not fall and break. This shows that he did not get worried of a tsunami immediately. Otherwise, he would have rushed out of the house at the first instant. The sentence in the text which shows that the Ignesium family did not have any time to discuss and plan their course of action after the tsunami struck is: 'in the chaos and confusion, two of his children caught hold of the hands of their mother's father and mother's brother, and rushed in the opposite direction.'

**Answer:** Both Meghna's and Almas' families were washed away. Both of them kept floating in the sea for days. Meghna floated in the sea for two days holding on to a wooden door. She was brought to the shore by a wave. Similarly, Almus climbed on to a log of wood and fainted. She woke up in a hospital. Both the girls were traumatised after the incident. While Meghna was seen walking on the seashore in daze, Almus does not talk about the incident to anyone.

### Question 4: What are the different ways in which Tilly's parents could have reacted to her behavior? What would you have done if you were in their place?

**Answer:** Not taking her seriously, Tilly's parents could have tried to calm her down thinking that she had been frightened by something. As a result, they could have been washed away by the tsunami waves. If I were in their place, I too would have listened to her and realised that there was a danger approaching. Consequently, I too would have rushed away from the beach.

### Question 5: If Tilly's award was to be shared, who do you think she should share it with — her parents or her geography teacher?

**Answer:** If Tilly's award was to be shared, she should share it with her geography teacher who made her aware of tsunami in the first place. It was this awareness that helped her save so many lives.

### Question 6: What are the two different ideas about why so few animals were killed in the tsunami? Which idea do you find more believable?

**Answer:** Many people believe that animals possess a sixth sense and know when the earth is going to shake. On the other hand, some experts believe that animals' more acute hearing helps them hear or feel the earth's vibrations. They can sense an approaching disaster long before humans can realise it. This second idea is more believable.

## Working with Language

**Question 1:** Go through Part – I carefully, and make a list of as many words as you can find that indicate movement of different kinds. (There is one word that occurs repeatedly — count how many times!) Put them into three categories.

fast movement	slow movement	neither slow nor fast
---------------	---------------	-----------------------

**Answer:**

fast movement	slow movement	neither slow nor fast
Earthquake	Floating	Walking
Rushed	Recede	
Tremors		
Swept		
Ran		
Fell		
Climb		

The 'fast movement' column has many more words as compared to the other two columns. This is because the story is about tsunami, which is a fast movement of waters. Due to tsunami, all the immediate actions are fast, such as running, climbing and sweeping away of people by water.
